

Nota Evolution

AUTOMATIC PID

1 gr Touch screen
preinfusion and extraction Flow-Time graph
and 3 extraction profiles

Evolution of Nota 1gr manual, the essence of espresso, under total control designed for coffee shops, roasters, and expert home baristas who seek precision and reliability in an ultra compact, energy-efficient format.

For the most demanding
small coffee shop, catering service,
coffee truck or your own
coffee station at home!

The essence of espresso under total control

Nota Evolution automatic 1 gr. PID Touch screen is born to maximize control and the quality of professional espresso in a compact, sophisticated machine like the manual Nota 1gr. Always with E61 brewing raised group, 3 litres copper boiler, switch for water loading selection (from the water system or from the tank of 2,2 litres with capacitive level detector), now enhanced with a new **100 L/h Fluid-o-Tech GA rotary pump**, new RPM motor, a new control unit, a **pressure transducer** for monitoring the rotary pump pressure, a **NTC probe** and an intuitive modern touch interface, also featured in the Etnica and Phonica Evo 1gr.

Integrated touch screen

A modern, intuitive interface that combines ergonomics and barista control for perfect repeatable extractions with advanced customization options with quick settings and full access to all operating parameters:

- Temperature (PID)
- 4 doses and 4 pre-infusions programming
- FLOW RATE + digit chrono
- Shot timer and counter
- Service and maintenance parameters
- General settings
- 3 programmed profiles:

**Extraction,
Latte/Steam,
Hybrid profile.**

Backup functions

1 semiautomatic button for coffee

Easy maintenance through:

- intuitive and tidy wiring
- easy replacement of boiler water inlet solenoid valve

TECHNICAL FEATURES	AUTOMATIC
Espresso coffee and cappuccino machine with thermosiphon system	1gr
E 61 brewing group (filter holder Ø 58 mm) with PURGE	●
Frame of satin-finished stainless steel AISI 304	●
Copper boiler (3 litres), copper pipes and brass pipe fittings	●
Water loading from tank (2,2 litres) with capacitive level detector	●
Water loading from water system	●
Automatic boiler water loading	●
Programmable portion control / Group cleaning	●
Built-in RPM single-phase motor pump with AIR cooling / 100 L/h Fluid-o-Tech GA rotary pump	●
Protection thermostat for heating element	●
Pressure transducer for pump pressure	●
NTC probe to adjust the boiler temperature	●
1 luminous electromechanical button to switch ON/OFF the machine	●
1 luminous electromechanical button for manual coffee brewing	●
1 multidirectional stainless steel steam wand with manual control from the tap knob	●
1 multidirectional stainless steel hot water wand with manual control from the tap knob	●
1 filter holder for 1 cup, 1 filter holder for 2 cups and 1 blind filter	●

TOUCH SCREEN DISPLAY	After turning on the machine displays the functional test.
The Barista can view: current profile, chrono (the quantity of water and its time both in preinfusion and dispensing are displayed in real time), flow-time graph FLOW RATE (it traces the profile of the preinfusion and dispensing flow of coffee spaced over time).	
The Barista can set and view: date, time, day of the week, auto ON/OFF, day off, language, counters page and the malfunction/alarm notifications, change barista password.	
If enabled from the Technician the Barista can set: profile selection, dose programming, preinfusion programming, boiler temperature programming.	
The Technician can set: water sensitivity, service cycles, water filter, load with coffee, filling up timeout, temperature units, economy timeout, brewing page, change technician password (and all the other barista's settings).	
The Technician can enable or disable: profile selection, dose programming, preinfusion programming, boiler temperature programming, level tank sensor.
