

phonica *Evolution*

AUTOMATIC PID

1 gr Touch screen

preinfusion and extraction Flow-Time graph

Dedicated to Ray Charles' life with a design that recalls the shape of the microphones of an unforgettable era, wants to be a tribute to those great and unrepeatable voices of the 20th century, that will always remain in the history of music.

Very high control of preinfusion and dispensing

Precision and reliability of temperature and pressure

Energy saving

Ease of maintenance

Phonica Evolution automatic 1 gr. PID Touch screen, evolution of the Phonica 1 gr. 2020, offers modern and complete control of extraction ideal for coffee shops, expert baristas, roasters or enthusiasts who demand high performance for high coffee consumption in a professional 1 group machine. Built with the same professional structure as the Etnica Evolution 2-3 groups, with **6,5 L insulated copper boiler and a 150 L/h Fluid-o-Tech rotary pump**, it integrates a high precision transducer, supported by an NTC probe for safety and backup. This system ensures wider and more accurate temperature control, reducing thermal fluctuations to about 0,2°C compared to 3,5°C in traditional systems. As a result, the Phonica Evolution achieves superior thermal stability and capacity, even under intensive use.

Integrated touch screen

A modern, intuitive interface that combines ergonomics and barista control for perfect repeatable extractions with advanced customization options with quick settings and full access to all operating parameters:

- Temperature (PID)
- 4 doses and 4 pre-infusions programming
- FLOW RATE + digit chrono
- Shot timer and counter
- Service and maintenance parameters
- General settings
- Energy Saving

Independent electronic control of each one of 3 legs of the heating element

technician/barista/factory setting

menu setting

Backup functions

1 semiautomatic button for coffee, manual refilling, NTC probe support.

Easy maintenance through:

- pull-out holder containing all the electrical and electronic controls of the machine
- intuitive and tidy wiring
- manual boiler water filling
- easy replacement of boiler water inlet solenoid valve

TECHNICAL FEATURES	AUTOMATIC
Espresso coffee and cappuccino machine with thermosiphon system, pressure transducer and temperature probe	1gr
E 61 brewing group (filter holder Ø 58 mm) with PURGE	●
Body of stainless steel AISI 304. Finishing of black methacrylate	●
Copper boiler with certified 10 mm thick insulation with tap for manual discharge, copper pipes and brass pipe fittings	●
Mixed hot water outlet	●
High-precision pressure transducer and temperature probe (NTC probe)	●
Single gauge for pump pressure	●
Manual and automatic boiler water loading	●
Programmable portion control / Group cleaning	●
Built-in RPM motor pump with AIR cooling / Fluid-o-Tech 150 L/h rotary pump	●
Protection thermostat for heating element	●
3 luminous electromechanical buttons to switch ON/OFF: the machine, all LED lights and the electric cup heater	●
1 luminous electromechanical button for manual coffee brewing	●
1 multidirectional stainless steel steam wand with manual control from the tap knob	●
1 multidirectional stainless steel hot water wand with manual control from the tap knob	●
1 filter holder for 1 cup, 1 filter holder for 2 cups and 1 blind filter	●

TOUCH SCREEN DISPLAY	After turning on the machine displays the functional test.
The Barista can view: operating status of the 3 independent legs of the heating element, chrono (the quantity of water and its time both in preinfusion and dispensing are displayed in real time), flow-time graph FLOW RATE (it traces the profile of the preinfusion and dispensing flow of coffee spaced over time).	
The Barista can set and view: date, time, day of the week, auto ON/OFF, day off, language, cup warmer temperature, counters page and the malfunction/alarm notifications, change barista password.	
If enabled from the Technician the Barista can set: consumption management through the 3 elements of the heating element, dose programming, preinfusion programming, boiler temperature and pressure programming.	
The Technician can set: water sensitivity, service cycles, water filter, load with coffee, filling up timeout, temperature units, economy timeout, brewing page, change technician password (and all the other barista's settings).	
The Technician can enable or disable: power limitation, dose programming, preinfusion programming, boiler temperature and pressure programming.	

1gr Automatic **PID** display

1gr Automatic **PID** display with joystick taps

OPTIONAL ON DEMAND	
Joystick taps	●
Nut wood kit: filter holders and knobs	●
Color options and aesthetic customisation	●
